

Mar Zallan Ismail

Full-Stack Software Engineer

React • TypeScript • Node.js • Python • AWS

+60 111 143 3952 • marzallan13@gmail.com • linkedin.com/in/marzallan • github.com/Marxz13

Full-stack software engineer shipping enterprise applications, SaaS platforms, and AI-powered tools end to end across React/TypeScript front ends, Python and Node.js back ends, and AWS infrastructure. Owns products across architecture, implementation, CI/CD, and production operations, with a focus on AI-native tooling and developer automation.

Experience

Zicy Kuala Lumpur, MY
Software Engineer Oct 2025 - Present

- Own core SaaS modules across Content Optimizer, Content Library, subscription, quota, billing, admin workflows, and the Chrome Plugin, spanning front-end delivery, API design, and production operations.
- Manage server updates and deployment operations across AWS EC2, GitHub Actions CI/CD, Celery workers, Nginx, systemd services, and automated deploy scripts.
- Built AI-search optimization (AEO/GEO) features end to end, from REST API design to the React analytics dashboard and real-time admin dashboard for prompt usage and platform activity.
- Implemented Stripe subscription, quota, and billing workflows with webhook handling, authentication middleware, and MongoDB-backed user management, supporting 15+ enterprise beta clients.

Growth.Pro Kuala Lumpur, MY
Junior Data Engineer Nov 2024 - Sep 2025

- Built an XGBoost property-price prediction model reaching an 89% R-squared score through feature engineering across 15,000+ records.
- Delivered a production Flask REST API with PyTest coverage and automated data pipelines, cutting manual processing time by 60%.

Fuji Elevator Cambodia Phnom Penh, KH
Full-Stack Developer Oct 2023 - May 2024

- Architected a 32-page enterprise ERP for elevator sales, installation, and maintenance operations, working directly with the CEO to define requirements.
- Built the React 18 / TypeScript front end with role-based access control (RBAC) across 8 user roles and 80+ granular permissions.
- Developed a FastAPI back end with 100+ REST endpoints, WebSocket notifications, and SendGrid email integration.
- Built 12-step wizard forms with smart auto-fill propagating data across Quote to Contract to Invoice workflows, plus a ReportLab/OpenPyXL engine for automated document generation.

Projects

Zicy Chrome Extension | *JavaScript, Chrome APIs, OpenAI API, REST* 2025

- Designed and built a Chrome extension end to end for Answer Engine Optimization (AEO), auto-generating JSON-LD schema markup to improve how search engines and AI systems parse a site.
- Implemented an AI-crawlability scoring system that grades a site's readiness for AI crawlers such as GPTBot, ClaudeBot, and PerplexityBot; grew the extension to 250+ users.

Tokkae Cambodian Marketplace | *Next.js, Expo, Go, Kafka, Redis, PostgreSQL* 2025 - Present

- Building a full-stack e-commerce marketplace spanning a web app and a cross-platform Expo (React Native) mobile client, with message-queue-driven event processing and Redis-backed caching.
- Designing a product-ranking algorithm that optimizes seller quality, relevance, and conversion signals.

Technical Skills

Languages: TypeScript, JavaScript, Python, Go, SQL, Java, C++, Bash

Frontend: React, Next.js, Nuxt, React Native (Expo), Tailwind CSS, shadcn/ui, Flutter, HTML/CSS, Vite

Backend: Node.js, FastAPI, Flask, REST APIs, WebSockets, BullMQ, Celery, Kafka

Databases: PostgreSQL, MongoDB, Redis, SQLite, Firebase/Firestore

DevOps & Cloud: AWS (EC2), DigitalOcean, Docker, GitHub Actions, Nginx, Linux/SSH

Tools: Git, PyTest, Jest, Postman, Swagger/OpenAPI, Stripe, SendGrid, n8n

Education

University of Nottingham Malaysia Semenyih, MY
B.Sc. Computer Science, Second Class Honours, Upper Division (2:1) Sep 2022 - May 2025
